

Easy to Use, Quick to Set Up, Nothing to Maintain.

Created to help courier companies, express transport networks and depots to cut costs and lift customer service levels.

Fully Integrated Accounts Receivable

Do you know how much it costs to produce one invoice?

The cost is more than the paper, envelope and stamp. If you include the amount you pay to have your trips entered into an accounting program, the average cost is \$7 to \$8 per invoice. Now multiply that by the number of invoices your company produces in one month.

IDS Internet Dispatcher reduces your workload with a simple "click" to produce all your invoices. It takes less than 2 seconds to produce 1 invoice. Multiply that by the number of invoice you do per month to see how much you are saving.

Our complete and integrated Accounts Receivable module allows you to post payments and adjustments and includes outstanding customer, posting and adjustment reports and statements.

Plus, Internet Dispatcher creates secure online statements, invoices and waybills allowing your customers to reconcile their trips.

IDS Internet Dispatch Services Ltd.
