

Easy to Use, Quick to Set Up, Nothing to Maintain.

Created to help courier companies, express transport networks and depots to cut costs and lift customer service levels.

Updates April 2008

Remember with IDS Internet Dispatch all updates are included. Latest Updates include:

Custom reports

Internet Dispatcher is now integrated with ReportMill for generating custom reports. You now have the same reporting power as UPS, USPS, Merrill Lynch, Toshiba, Apple, Toyota and more.

Trip Search

We have added an even more powerful search. You can search through all your new and past trips by trip status and/or customer account.

Advanced Automatic Pricing

Create Account or Customer based pricing to completely override your existing "rack" rate and structure for a customer - automatically. Also included are "Hidden" packages.

Digital Dispatching

Even more reliable and easier to use. Updates include dispatched pick up and delivery notes.

Those are just some of the exciting new updates that IDS Internet Dispatch customer just received at no extra cost.

IDS Internet Dispatch Services Ltd.
