

Easy to Use, Quick to Set Up, Nothing to Maintain.

Created to help courier companies, express transport networks and depots to cut costs and lift customer service levels.

Digital Dispatching

Do you know how much time it takes to dispatch one trip?

Including unanswered calls to your drivers and repeat calls to resolve communication mistakes, each trip takes 2 to 5 minutes of your dispatcher's time. Now multiply that by the number of trips your company does per day.

And that doesn't include calls for package status updates!

Internet Dispatcher reduces your workload with a simple "click" to assign a new delivery instantaneously providing information to your driver. It takes less than 10 seconds to dispatch one trip. Multiply that by the number of trips you do per day to see how much you are saving.

Plus, drivers can simply "click" to update package status providing real-time tracking details and POD name capture for your customers.

IDS Internet Dispatch Services Ltd.
