

Easy to Use, Quick to Set Up, Nothing to Maintain.

Created to help courier companies, express transport networks and depots to cut costs and lift customer service levels.

IDS – Internet Dispatch Services Ltd

The only **Complete Web-Hosted Software Solution** to the Courier, Messenger, Delivery and Freight Industries.

Web-hosted allows you to control your cost by outsourcing your IT, hardware and software needs and gives you increased functionality through the power of internet with digital dispatching, online shipping, package tracking and GPS driver location

Digital Dispatching – reduce your Dispatcher’s workload with a simple “click” to assign a new job and instantaneously provide information to the driver. Drivers can simply “click” to update package status providing real-time tracking details and POD name capture for your customers. Save the Radio “Chatter” for the really important issues.

Fully Integrated Accounts Receivable Package – you can create all your invoices with one simple click. Gone are the days where you have to re-enter your trip details into another software package. Post payments, make adjustments and more

Online Shipping Center - have your customers go online to book shipments, print waybills, check invoices, track shipments and more. You can now provide a whole new level of service and save money.

And of course we still offer...

- Driver Mapping for Pick Up and Drop of location.
- Driver GPS Tracking
- Online Shipping Center
- Real-Time Package Tracking including POD storage.
- Incredibly Fast Trip Entry Forms.
- Plus Lots More....
