

IDS Internet Dispatch and the Motorola ES400

Web hosted 2-Way Dispatch Solution for the Courier, Trucking and Delivery Service Industries.

Digital Dispatching

Reduce your Dispatcher's workload with a simple "click" to assign a new shipment and instantaneously provide information to your drivers. Drivers can simply "click" to update shipment status providing real-time tracking details. Save the Radio "Chatter" for the really important issues.

GPS Tracking

Know in real-time the locations of your drivers so you can send the right shipment to the right person. Track how long each driver was at each location.

Signature Capture

Now you can afford a solution that will give you real signature capture with a quick click. Separate yourself from the competition.

Barcode Scanning

Produce and scan waybills all with one simple solution. Scan for Proof of Delivery, Chain of Custody and Package Control.

Plus Lots More....

Starting at only \$10 per month per user
